

NC CONTRACT

CUSTOM CAPABILITIES FOR COMMERCIAL APPLICATIONS

NORTHERN } CONTOURS®

IMMEASURABLE AMBITION

NC Contract is our showcase for highly customized components in commercial applications. Our materials cater to designers' tastes while meeting the functionality and durability requirements of our customers. We offer innovative design capabilities, flexible order quantities, value added services, short lead-times, affordable pricing, and excellent customer service. With NC Contract, we're offering you industry leading experience and the products to make your ideas work.

TECHNICAL DESIGN EXPERTISE

Our team of experienced engineers and designers will collaborate with your development team to take your projects from concept to reality. We can assist you by prototyping, analyzing new designs, suggesting modifications to increase yields, and by providing quality execution of your design. We focus on collaborative design and value engineering processes so you can feel free to exercise your creative vision.

SPILL CONTAINMENT

Customized routing, pressed and sealed on all edges

GROMMET HOLES

Routed and pressed all the way through

MITER FOLDING

Assembled floating shelves, thick surfaces, and modern 3-dimensional components

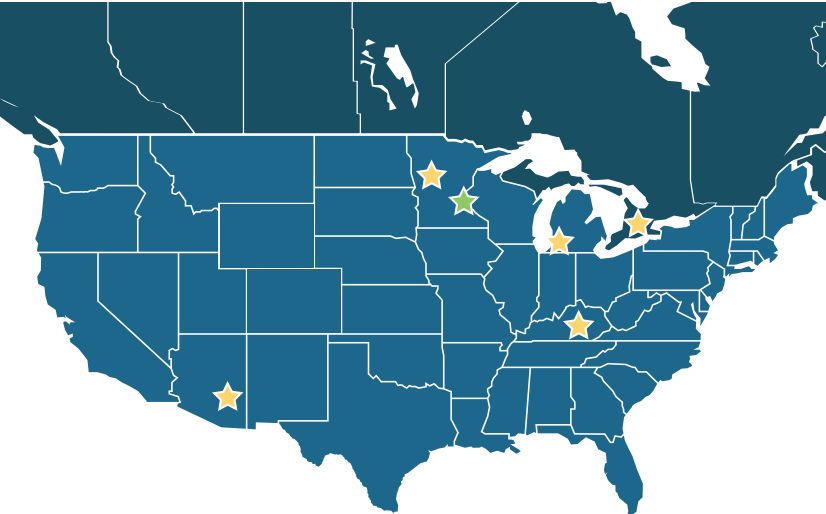

BACKSIDE MACHINING

Drilled, routed, ready for assembly

STRATEGIC MANUFACTURING

With five facilities in the US and Canada, our geographic locations effectively serve customers throughout North America and beyond. Multiple plants allows level loading of production schedules and shorter lead times.

★ = Corporate Headquarters

CUSTOM COMPONENTS

SURFACES

Modern design meets functionality with our seamless, soft-edged surfaces. We offer a collection of standard shapes in custom sizes for a variety of work and dining applications. Surface shapes can be mixed and matched to custom fit your layout.

SPECIALIZED TOPS

From high-end custom projects to volume runs, we have the expertise to manufacture your unique designs. Our high-performance 3D laminate tops are seamless and aseptic, alleviating the risk of infection and the spread of bacteria.

SHELVING

Innovative shelving solutions are within reach with membrane pressed or miter folded components. Attract customers and capitalize on current trends by using matte or textured 3D laminate shelving that makes your merchandise pop. Our shelving components are made for longevity and aesthetic appeal!

SEATING

You need seating that can withstand the wear and tear of everyday use. Our 3D laminate components outperform wood counterparts and exceed standard budgetary life cycle expectations. The difference is that our 3D laminate is finished with a high-performance topcoat that provides scratch, water, and impact resistance.

STORAGE SOLUTIONS

We offer a full array of material options for doors and fronts, letting you focus on design possibilities. Enrich wood textures and finishes with shining, acrylic accents to create high-end looks, or choose just one material for a clean, uniform design.

VERSATILE MATERIALS

SOLID 3D LAMINATES
Provide value and resist scratching, staining, chipping, and impact, giving you quality components that last longer.

WOODGRAIN LAMINATES
Smooth or embossed woodgrains available for any design style.

WOOD VENEER
Ideally suited for hospitality, executive applications and boardrooms. Natural & Reconstituted species.

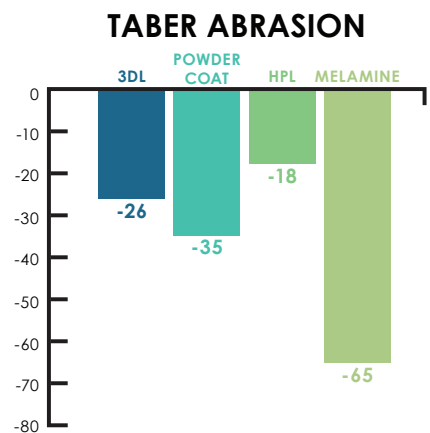

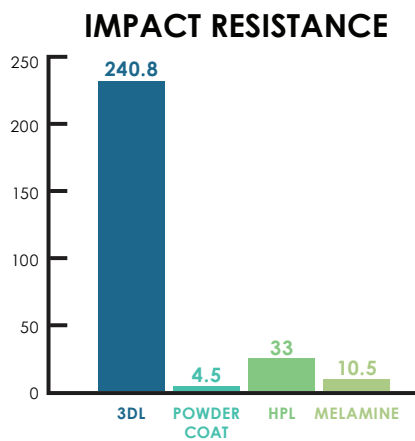

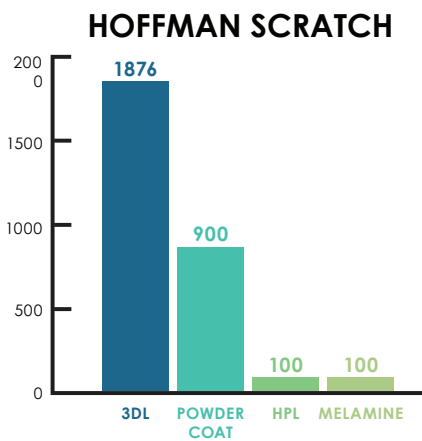

ABSTRACT 3D LAMINATES
The look of high end stones, marbles and geometric patterns with the engineered benefits of 3D laminates.

MATTE FINISHES
Eye-catching colors and soft touch materials are great for storage solutions, wall panels, and more. Available in SuperMattes, SmartMattes, or FENIX NTM®

HIGH GLOSS ACRYLIC
Sleek, attractive sheen creates modern, sophisticated design.

THOROUGH TESTING

Our materials endure rigorous, comprehensive, state-of-the-art testing by an independent source, giving you analytical information you can rely on to make informed decisions on materials. Each test reflected in the data below was conducted using a standard white 3D laminate, white powder coated, white HPL, and white melamine component on an engineered core. In addition, we keep a color master on file for all 3D Laminates and test every incoming shipment to ensure we have year to year and lot to lot consistency.
